

World's first  
3D tracking radar  
for golf

Randy Wexter utilizes the **FlightScope** launch monitor at his Golf Academy at SPG Green Garden Country Club.

Accuracy matters. **FlightScope** learned from improvements in their defense division and applied the military-precise technology to the launch monitor. The revolutionary new radar design and implementation delivers unprecedented accuracy. The new microwave component greatly enhances the unit's signal detection ability. With higher performance, increased signal clarity, and more consistency, **FlightScope** provides advanced accuracy on every measurement and data parameter.
